EIFS QUALITY ASSURANCE

As with other building system components, quality installation and positive performance of EIFS relies heavily on workmanship and conditions encountered during the planning and construction phase.

Our trained and Certified EIFS Inspectors represent *your* interests by lending an independent and unbiased quality assurance component to your project.

EIFS Specification Review

- Professional review and critique of proposed EIFS system(s) and approved specifications.
- *Need a second set of eyes to review and bolster your plan? We're here to help.*

Bid / Proposal Review and Recommendation

- Thorough review of existing contractor's bids or proposals for evaluation of completeness, capability, and compliance with your requirements and approved specifications.

Quality Assurance and Specification Compliance Observation (part or full-time)

- Quality Assurance Observation provided during critical phases of construction such as inspection of substrate conditions, system attachment, coatings and reinforcement materials, and other important details.
- *Continuous* Specification Compliance Observation provided during *all* phases of the EIFS project.
- *Short on time or staff resources? Allow us to monitor your project and provide you with status updates and other pertinent correspondence.*
- *Our inspection services provide added confidence that your EIFS project is being monitored for specification compliance and general adherence to applicable standards compiled by ASTM, ANSI, EIMA, and AWCI.*

WATERPROOFING QUALITY ASSURANCE

Waterproofing work for new construction projects typically does not cost a lot. Waterproofing remediation and rehabilitation *does* cost a lot. Once waterproofing components are installed, they are usually inaccessible and are extremely difficult to repair and maintain.

Our trained and certified waterproofing industry professionals represent *your* interests during the construction process.

Our independent and unbiased services afford you confidence your roofing project is completed to *your* specific requirements.

Waterproofing Specification Review

- Professional review and critique of proposed above-grade (through-wall flashings, masonry to membrane transitions, air / vapor barriers, etc.) and below grade (foundations, plaza decks, parking structures, etc.) systems and approved specifications.
- *Need a second set of eyes to review and bolster your plan? We're here to help.*

Bid / Proposal Review and Recommendation

- Thorough review of existing contractor's bids or proposals for evaluation of completeness, capability, and compliance with your requirements and approved specifications.

Quality Assurance and Specification Compliance Observation (full or part-time)

- Quality Assurance Observation provided during critical phases of construction such as inspection of substrate conditions, system attachment, flashing installation, sheet metal details, and other important details.
- *Continuous* Quality Assurance Observation during all phases of the project including phasing and transitions between systems and trades. .
- *Short on time or staff resources? Allow us to monitor your project and provide you with status updates and other pertinent correspondence.*
